

LEARNING JOURNEY

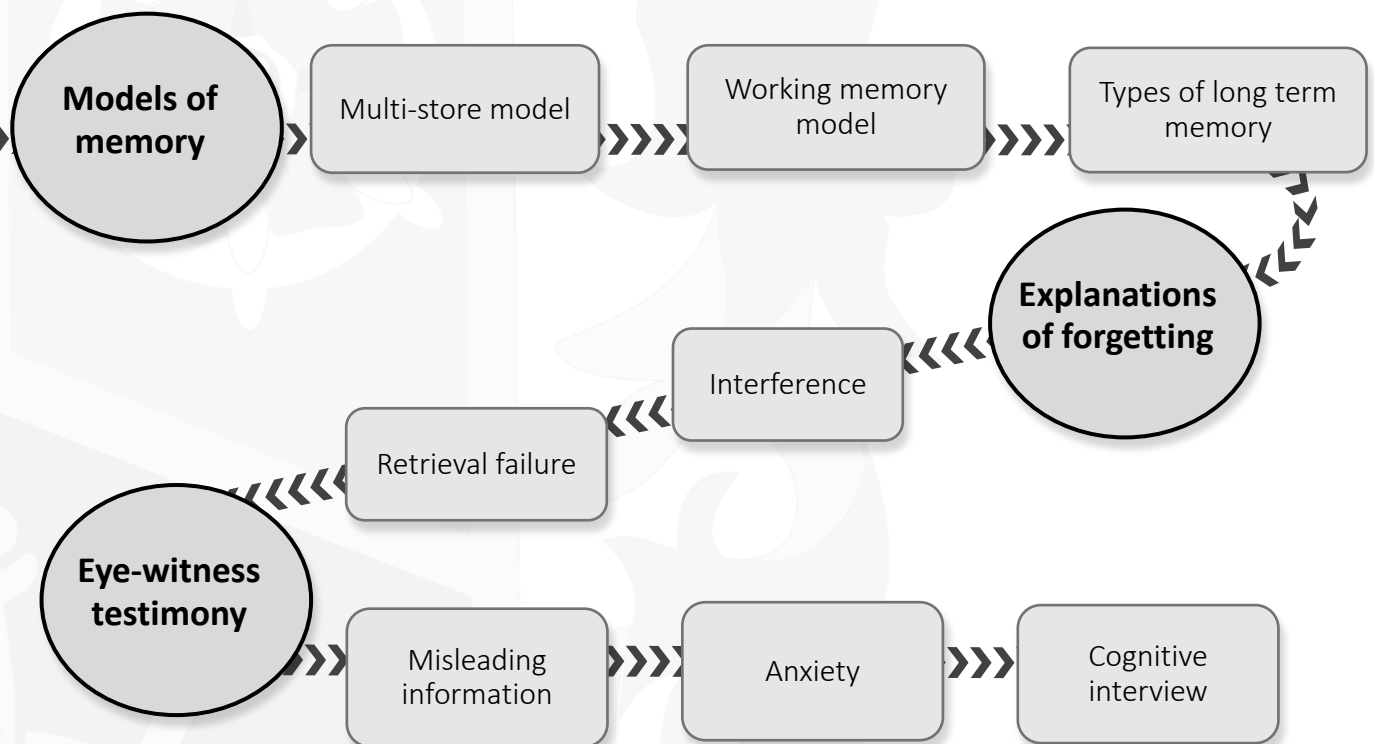

PSYCHOLOGY

Memory

Year 12 Autumn term

Our memories are the fundamental building blocks of who we are. You will develop an understanding of memory processes, theories and structures. This will enable you to revise, rehearse and master knowledge that will prove vital for your revision strategies and your future academic studies more expertly.

TUDOR HABITS AND VALUES: You will develop your understanding of process and not product through learning about how memory works. Understanding key ideas as to how memory is an active process and something that needs frequent rehearsal and alterations to ensure it is processed at the deepest level. There is never a finished product when it comes to memory.

VOCABULARY: Episodic, semantic, procedural, coding, capacity duration, encoding, storage, retrieval, case studies, independent & dependent variable. Eye-witness testimony. Cognitive interview.
