

LEARNING JOURNEY

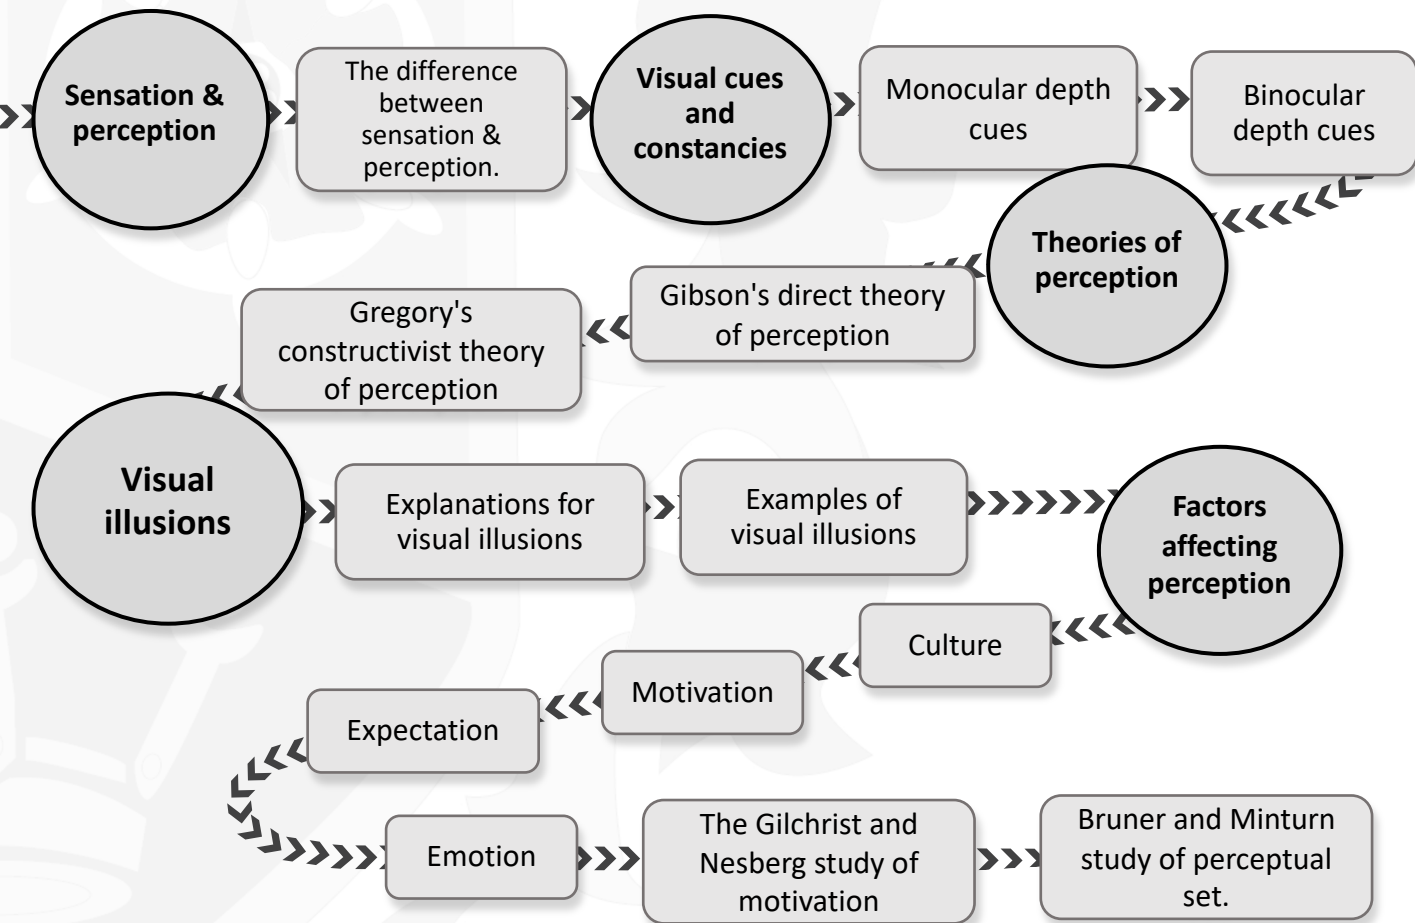

PSYCHOLOGY

Perception

Year 10 Spring term

How we perceive the world around us shapes who we are. You will develop their understanding of how we interpret the world around us. Developing your understanding of our senses through visual illusions & experiments. Understanding the lens through which we see the world can help us to understand the perspectives of other people and cultures. Becoming aware of our own biases can help us to build a more well-rounded view of the world around us.

TUDOR HABITS AND VALUES: You will develop your kindness & empathy intrapersonal skills through learning about different cultures and the way that they see the world. Considering how people construct the world around them helps us to empathise with why people behave the way they do.

VOCABULARY: Sensation, organisation, depth cues, motion parallax, nature, inference, visual illusions, nurture, perceptual set, culture, motivation, emotion, expectation.
