

LEARNING JOURNEY

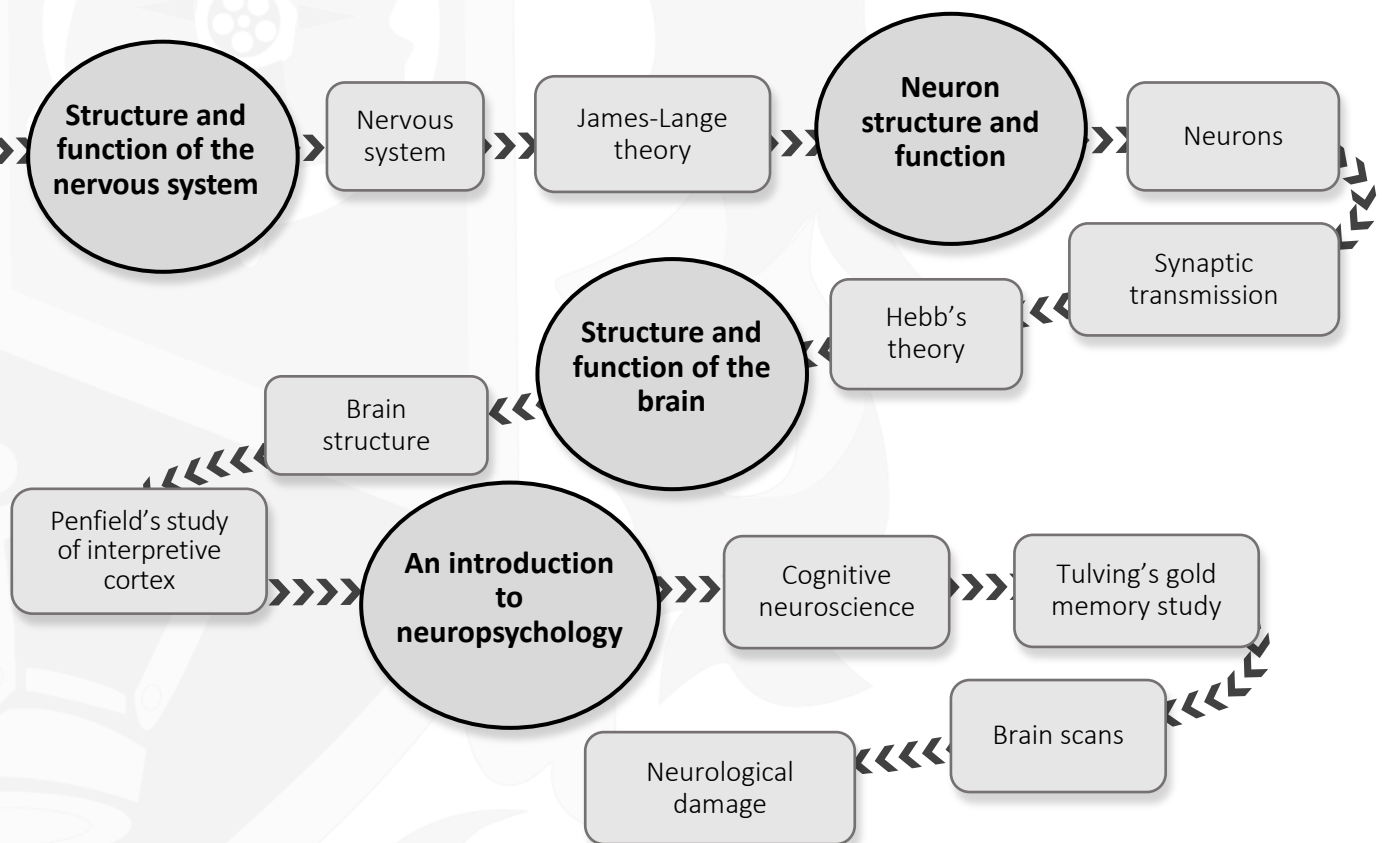

PSYCHOLOGY

Brain & neuropsychology

Year 11 Spring term

How the brain or the 'seat of the soul' works helps us to comprehend what it is to be human. You will develop your understanding of the human nervous system, neurons and the structure & function of the brain. Alongside this, you will build on your knowledge of brain injury and comprehend key theories and experiments surrounding neuropsychology.

TUDOR HABITS AND VALUES: You will be working on your intrapersonal skills of kindness and empathy looking at a range of neurological disorders whereby people have had significant effects to their quality of living. This will take an enormous amount of kindness and empathy.

VOCABULARY: Synapse, neurotransmitter, action nervous system, brain, stroke, neuropsychology.
