

LEARNING JOURNEY GERMAN

Freizeit und Technologie (free time and technology)

Year 10 Summer Term

In Year 7, you learnt how to talk about your free time activities, including sports, TV and hobbies. We are now revisiting this topic and developing our use of complex language to give preferences. We will also use time references to say how often we do things, as well as connectives to extend our sentences and give more detailed justifications. The second half of this unit of work considers the use of technology in our free time. As technology forms such a huge part of our daily lives in modern society, it is important that you are equipped with the language to be able to express your opinions on topics such as social media. We will further develop the structures used in the previous topic (town and local area) to support you in discussing the pros and cons of different aspects of technology as well.

TUDOR HABITS: You will develop responsibility and integrity as you consider the appropriate use of technology, including mobile phones and the internet, and gratitude as we consider that others may have different experiences with technology and social media.

VOCABULARY:

treiben, probieren, nutzen, soziale Netzwerke

Direct object
