

LEARNING JOURNEY

Biology

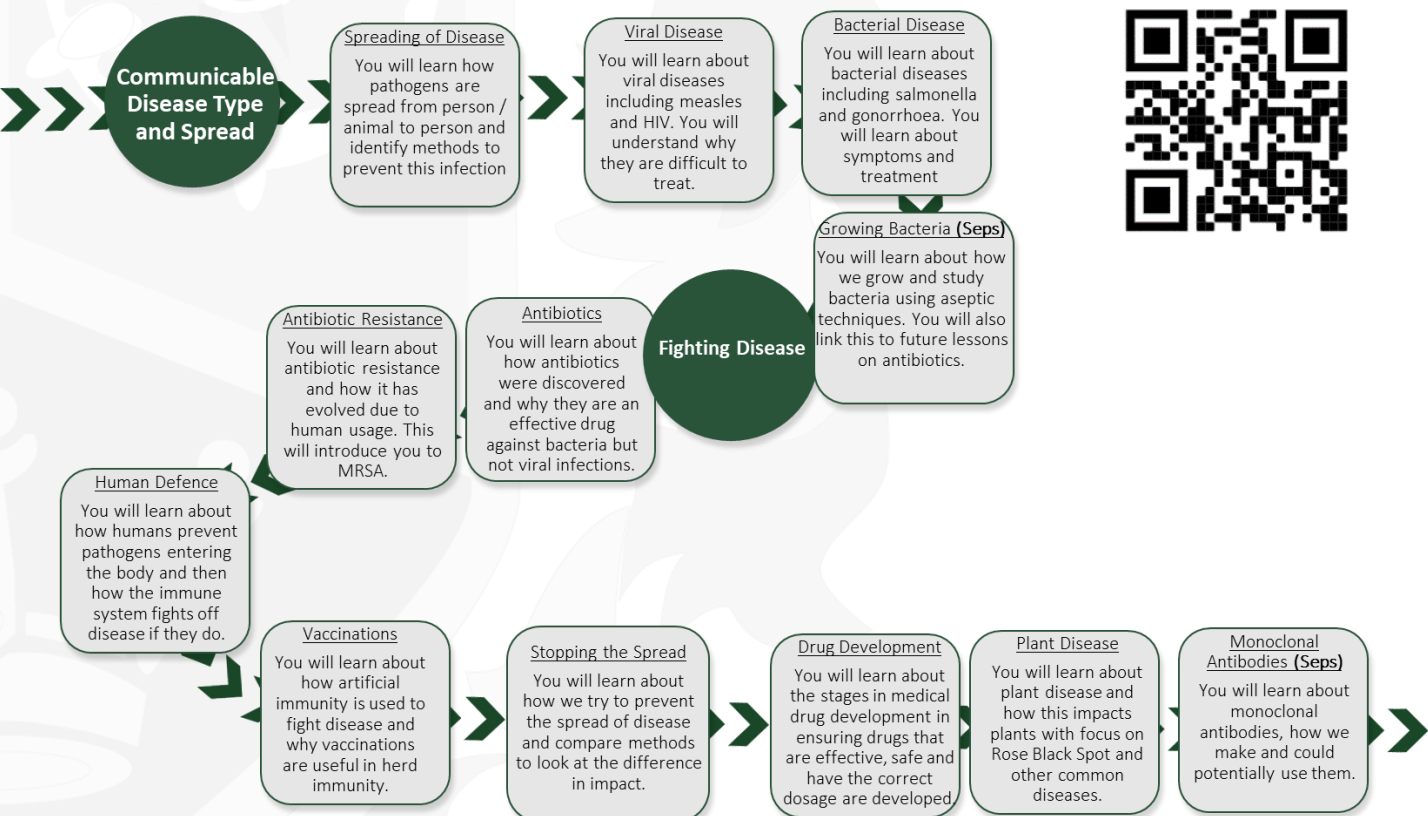

B5 – Health and Disease (Separates)

Year 10 Autumn Half Term 1

This module continues your learning journey from the previous module on Non-Communicable Disease. This module looks at how disease is caused by different pathogens and how they actually make you unwell.

From this you will develop a understanding on how we fight diseases through both natural methods and treatment.

The final part of the module is about plant disease which many often don't consider but has a large impact on our ability to produce crops and feed the world.

TUDOR HABITS: You will develop the Tudor Habit of responsibility and empathy as we consider your responsibility for your own health and how to prevent disease spread.

VOCABULARY:

Pathogen
Communicable
Vaccination
Double-blind trial
