

LEARNING JOURNEY

Biology

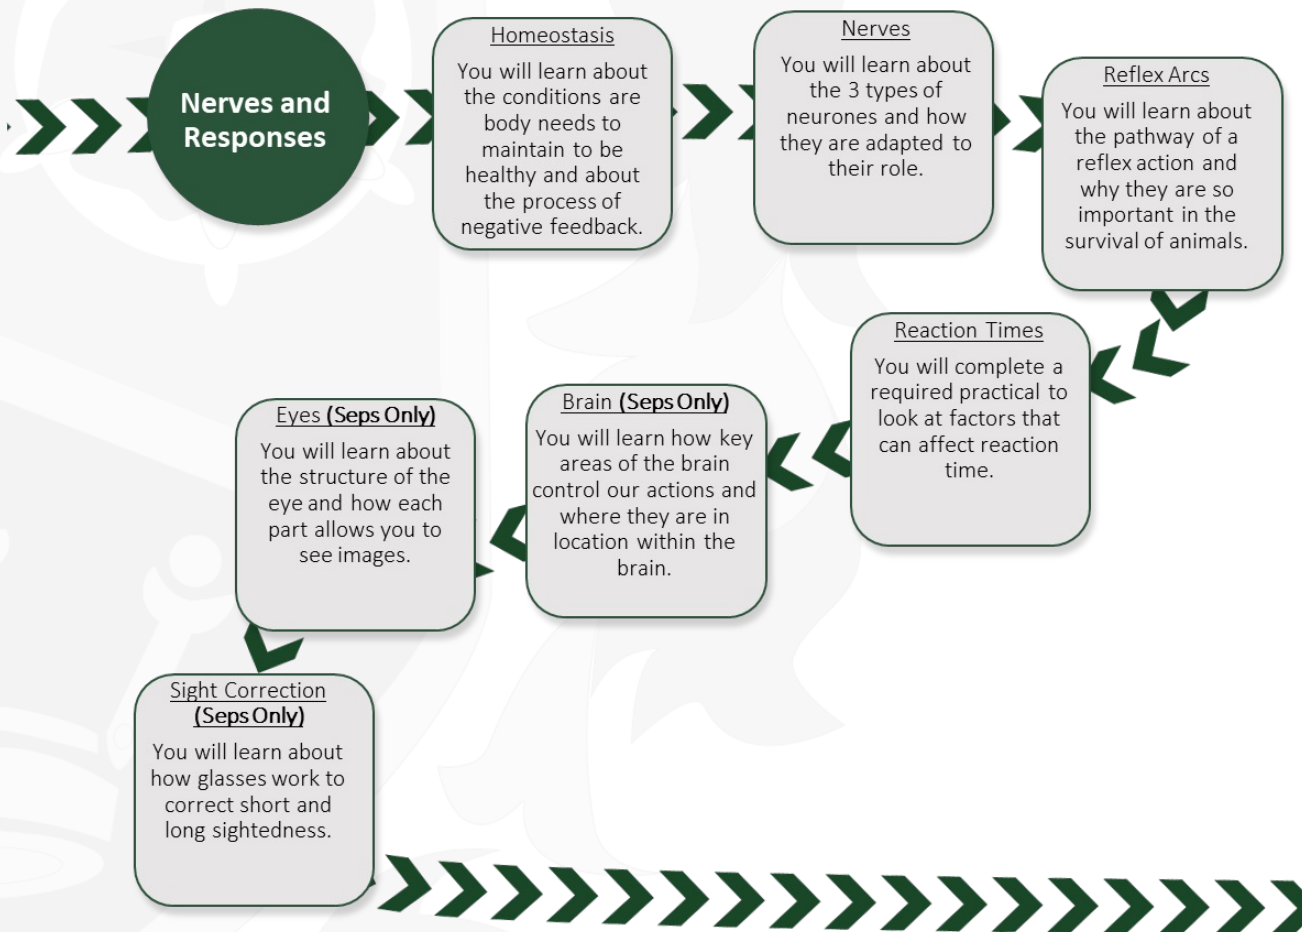

B7 – The Nervous System (Trilogy and Separates)

Year 11 Autumn Half Term 1

This module continues your learning journey from previous learning in Key Stage 3 about specialised cells.

You will learn about how the nervous system helps to coordinate homeostasis in a very specific pathway called a reflex arc.

Separate Science students will also focus on how key receptors of the eyes work and how the brain coordinates the body and it's responses.

TUDOR HABITS: You will develop the Tudor Habit of Positive Self Regulation in terms of looking at the impact of drugs on your nervous system and reaction times.

VOCABULARY:

Receptor
Sensory Neuron
Relay Neuron
Motor Neuron
Effector
