

LEARNING JOURNEY

Biology

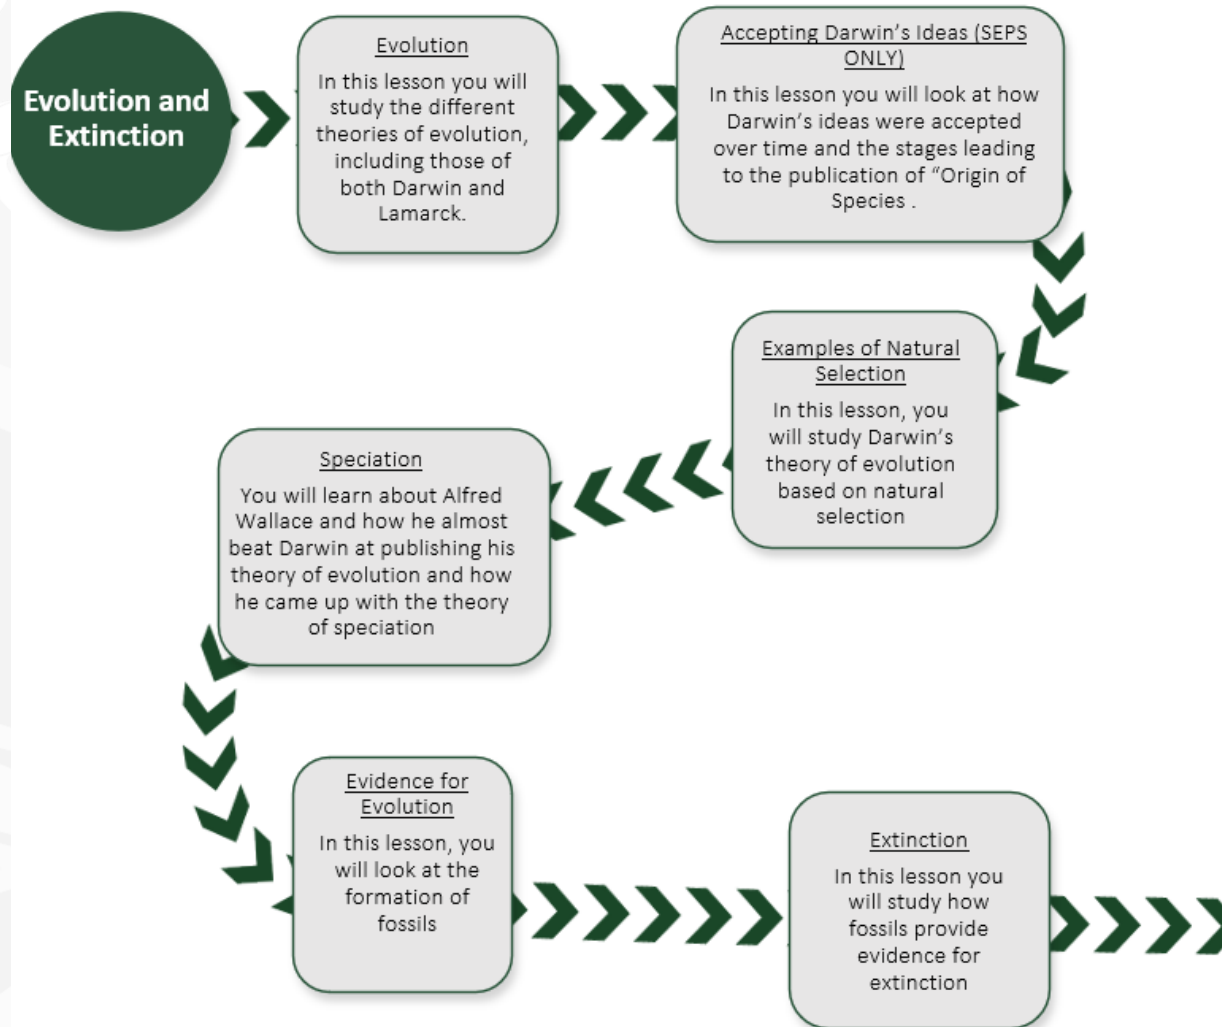

B13 – Evolution and Extinction

Year 11 Spring Half Term 2

This module continues your learning journey from previous learning in Key Stage 3 about genetics and variation.

You will develop a much greater understanding of the work of Charles Darwin and how his ideas were accepted over time

You will also study the importance of fossils and how they help provide evidence for evolution and extinction.

TUDOR HABITS

You will develop the Tudor Habit of being curious as we develop opinions on all the different theories about how life may have started and evolved.

VOCABULARY

Variation
Adaptation
Allele
Mutation
Extinct
