

# LEARNING JOURNEY

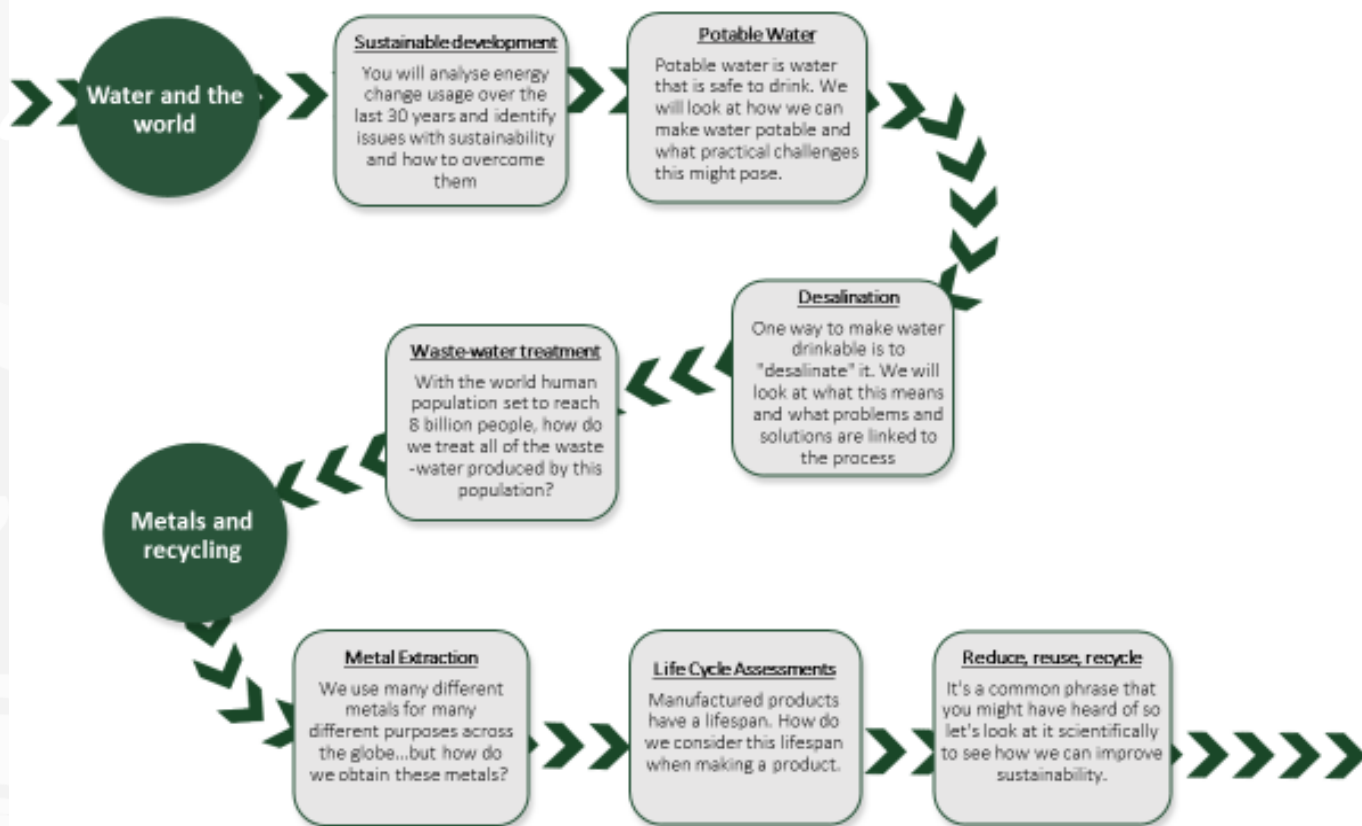

## Chemistry

### C14 – The Earth's resources (Trilogy and Separate)

This module continues your learning journey from the work covered in Key Stage 3 about the earth as a source of limited resources and the efficacy of recycling. You will also have looked at extracting metals from metal oxides.

During this module, you will develop an understanding of recycling in more detail. You will see how a range of different approaches now need to be taken as the world's finite resources start to diminish. You will also look at more ways to extract the remaining metals found in the earth's crust.

**TUDOR HABITS:** You will develop the Tudor Habit of being open to failure and feedback and you will learn from making mistakes and developing your resilience.

#### VOCABULARY:

Finite  
Renewable  
Potable  
Desalination
