

# LEARNING JOURNEY **Biology**

## 7.3 - You are what you eat

Year 7 Spring Half Term 2

Biology is the study of living organisms and their environment.

In this third module you build on previous learning about what life and cells and start to apply it to the process of digestion. This will increase your understanding of the role of organs, and how to work scientifically.

### VOCABULARY

Carbohydrate, protein, fats, starch, biuret, benedict's, iodine

### TUDOR HABITS

You will develop the Tudor Habit of positive self-regulation as you'll need to conduct experiments in a scientific manner.
