

LEARNING JOURNEY CHEMISTRY

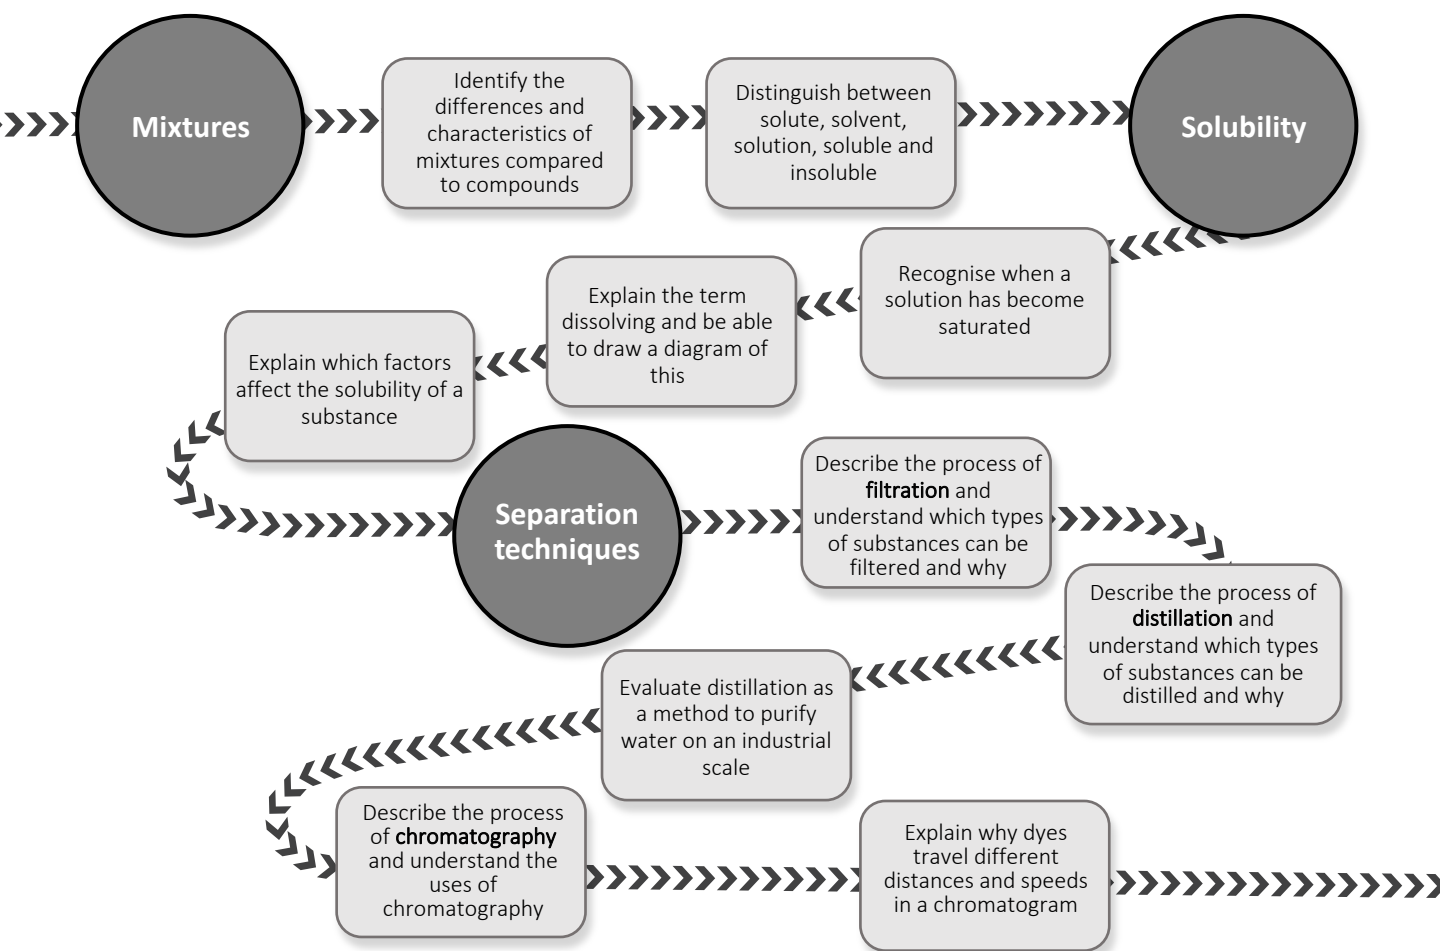

Separating Mixtures

Year 7 SummerTerm

Being able to separate mixtures is an important skill in chemistry and is an essential skill in forensic science.

In this topic, you will learn how to separate different types of substance using different separation techniques and be able to evaluate the appropriateness of each. Practical lessons will help to cement your understanding of why different techniques are necessary.

TUDOR HABITS: You will develop your process not product habit in this module as you seek to find out why certain substances can only be separated using certain techniques

VOCABULARY: mixture, compound, solute, solvent, solution, soluble, insoluble, saturated, dissolve, filtration, evaporation, distillation, pure, chromatography
