

LEARNING JOURNEY

Biology

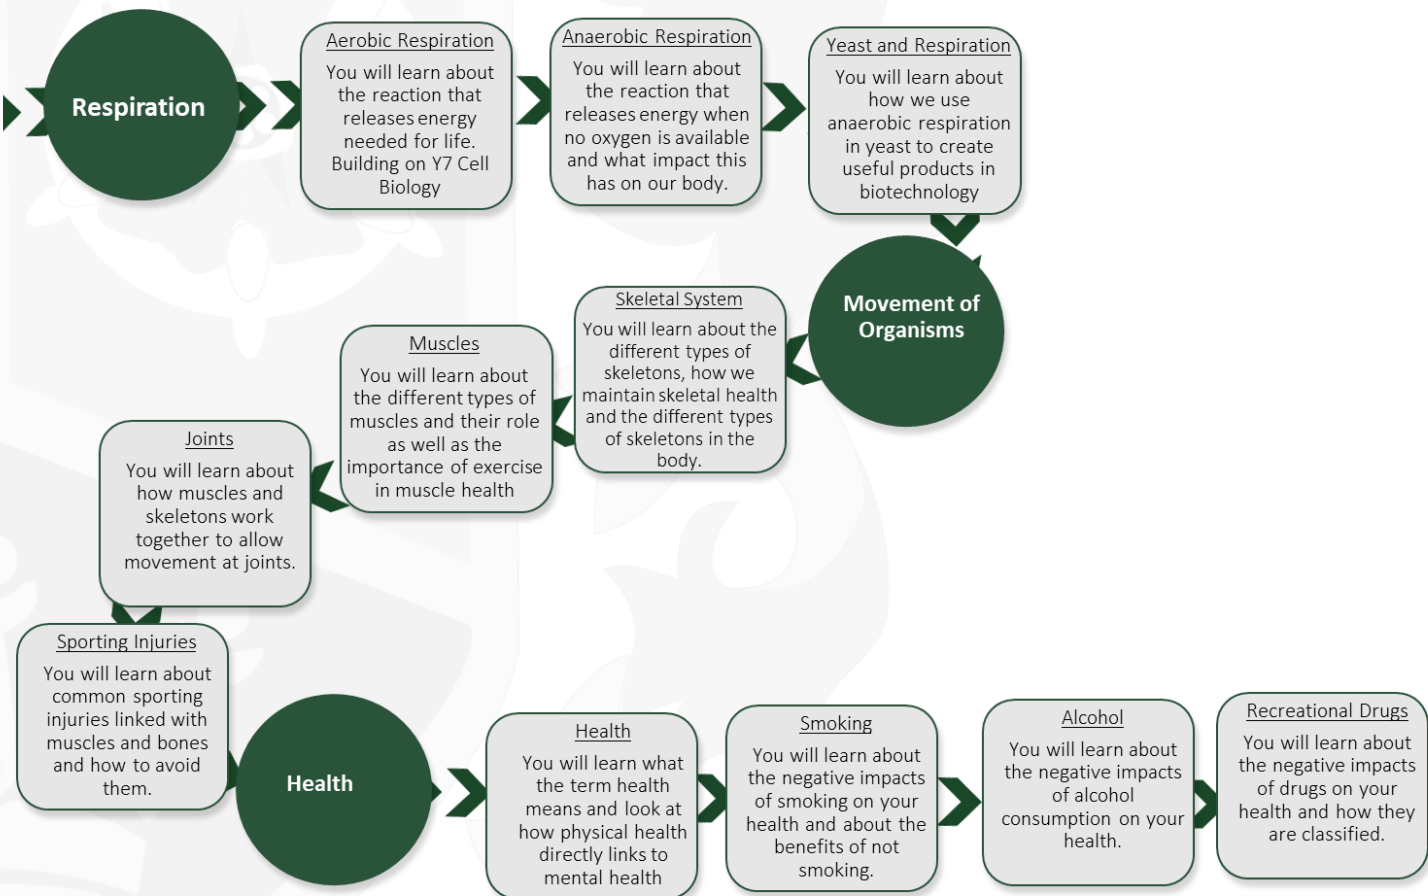

Respiration + Movement and Health

Year 8 Autumn Term

Biology is the study of living organisms and the environment.

Respiration is a key focus which will run through the whole of your biology lessons during all years.

Respiration is the process to release energy, which is critical in your understanding of biology moving forward.

TUDOR HABITS: You will develop the Tudor Habit of Responsibility and Positive Self Regulation as you learn about the impacts of an unhealthy lifestyle on your health.

VOCABULARY:

Mitochondria	Addiction
Lactic Acid	Fermentation
Anaerobic	Skeletal
Antagonistic muscles	Tendon
Tar, Nicotine and Carbon Monoxide
