

# LEARNING JOURNEY

## German

### Die Welt der Arbeit (the world of work)

Year 11 Autumn Term 2

At the start of the GCSE course you covered the topic of school, this unit of work extends and develops this knowledge further to specifically describe post 16 options and then discuss the world of work. Although lots of the vocabulary may be new to you, you will draw on lots of the structures that you have previously learned, such as the future tense and modal verbs, but also broaden your usage of these grammatical concepts to include a greater variety of language. This depth of linguistic understanding will add further depth and sophistication to your work and will empower you to tackle more challenging texts. Additionally, this unit has clear links to the RSHE and careers curriculum, so you will be able to utilise your knowledge of these aspects of the curriculum to support you further.

Learning about how a German CV differs from a British one.

**TUDOR HABITS:** Be reflective: This topic allows for plenty of recap and consolidation of previously learned structures, including tenses and negatives. Engage with this previously learned language to link ideas and concepts within this new topic together.

#### VOCABULARY:

negative structures

arbeiten, der Beruf, die Lehre, fleißig
