

# LEARNING JOURNEY GEOGRAPHY

## Changing Economic World

### Year 11 Spring Term

This topic incorporates many different aspects that we have previously looked at in other topics. There are many links to the 'Urban Issues and Challenges' topic through population pyramids and deindustrialisation etc. Additionally, the thread of **quality of life** being dependent on wealth will be fundamental to this topic. However, we will be looking at this on a much bigger scale as it will be country wide. Our two contrasting case studies of **Nigeria** and **The UK**, will allow us to compare how different countries are impacted by the global economy, be that the presence of **TNCs** like Shell or the introduction of **government policies**.

**TUDOR HABITS AND VALUES:** This topic will provide you with plenty of 'process not product' opportunities as you draw on previous knowledge to support your application of key themes like quality of life and deindustrialisation through exam-style questions.

**VOCABULARY:** demographic transition model, population pyramids, foreign direct investment (FDI), transnational corporations (TNCs), development gap, post-industrial, north-south divide, Commonwealth
