

LEARNING JOURNEY

Chemistry

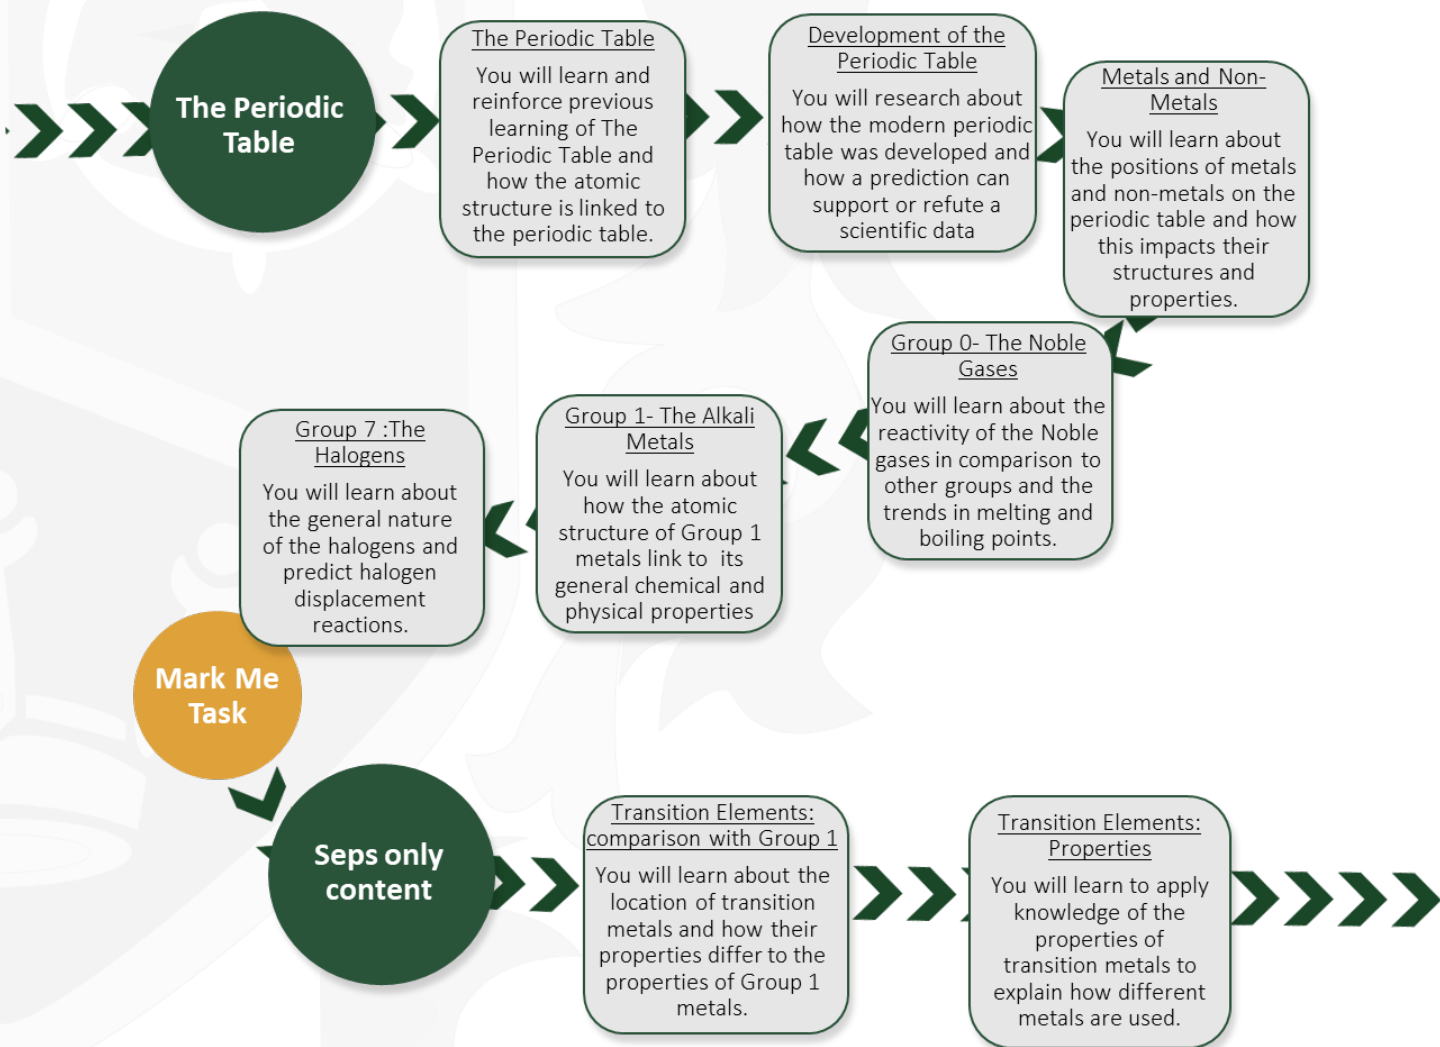

The Periodic Table

Year 9 Summer Term

This module continues your learning journey from previous learning in Chemistry about the periodic table. This module will develop understanding on how the periodic table provides chemists with a structured organisation of the known chemical elements from which they can make sense of their physical and chemical properties.

This module will develop understanding on the historical development of the periodic table and models of atomic structure to provide good examples of how scientific ideas and explanations develop over time as new evidence emerges.

TUDOR HABITS: You will develop the Tudor Habit of Positive Self-Regulation as you learn through practical discovery.

VOCABULARY:

Property
Reactivity
Displacement

Period
Trend
Halogen

Noble Gas
