

LEARNING JOURNEY

Biology

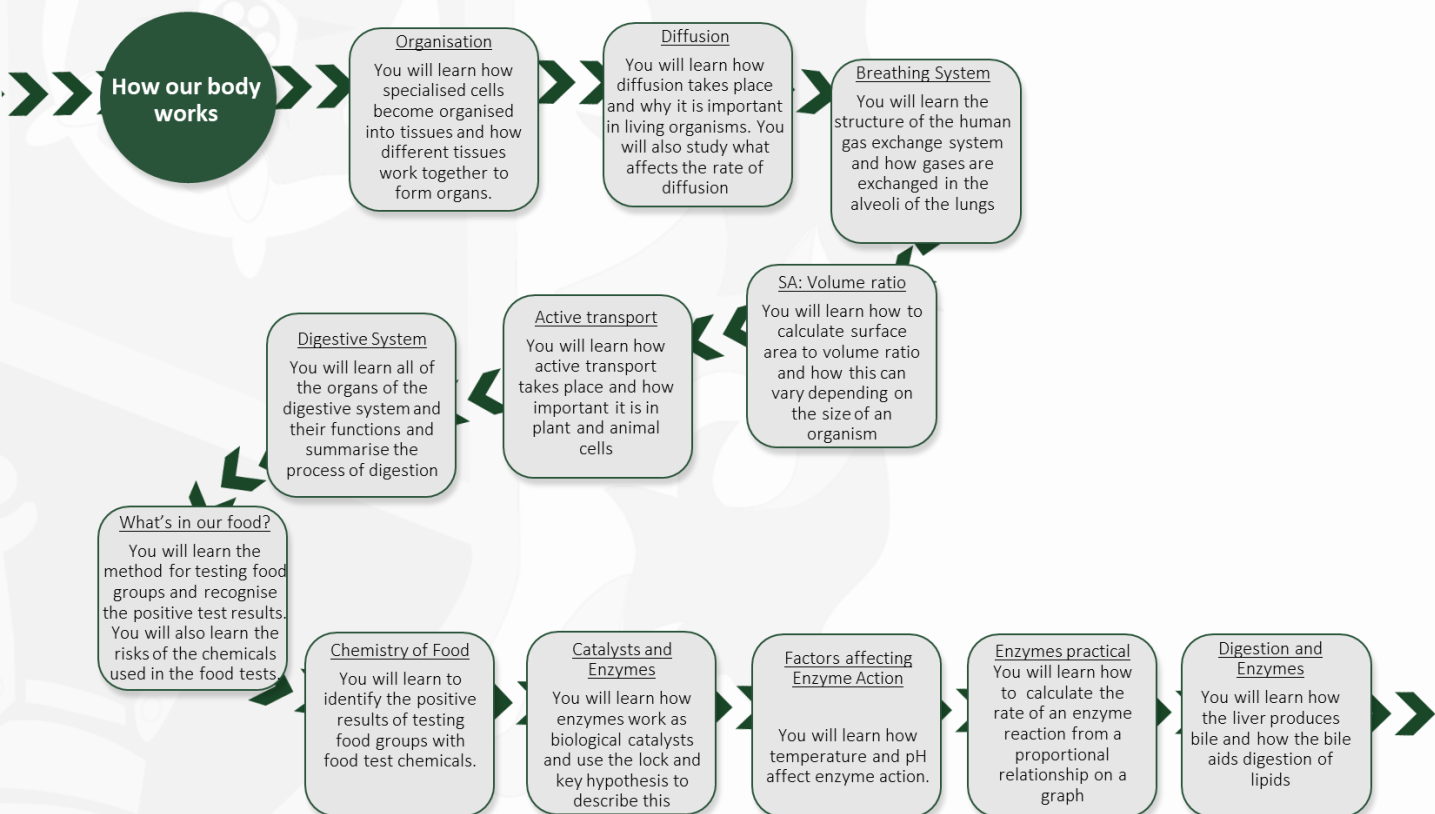

B2 Organisation 1 - How our body works

Year 9 Summer Half Term 2

This module continues your learning journey from previous learning from year 8 Respiration and Digestion Modules to build your understanding of the structure and functions of these systems.

This module builds on your understanding of breathing, respiration and digestion from Key Stage 3 to develop your understanding of gas exchange systems in organisms, the movement of molecules, digestive system and enzyme activity.

TUDOR HABITS:

You will develop the Tudor Habits of Positive Self Regulation and Resilience in planning and carrying out longer practicals during this topic.

VOCABULARY:

Ventilated	Specialised	Substrate
Catalysts	Active Transport	Denature
Enzymes (Biological Catalysts)		
Active site	Lipids
