

# LEARNING JOURNEY

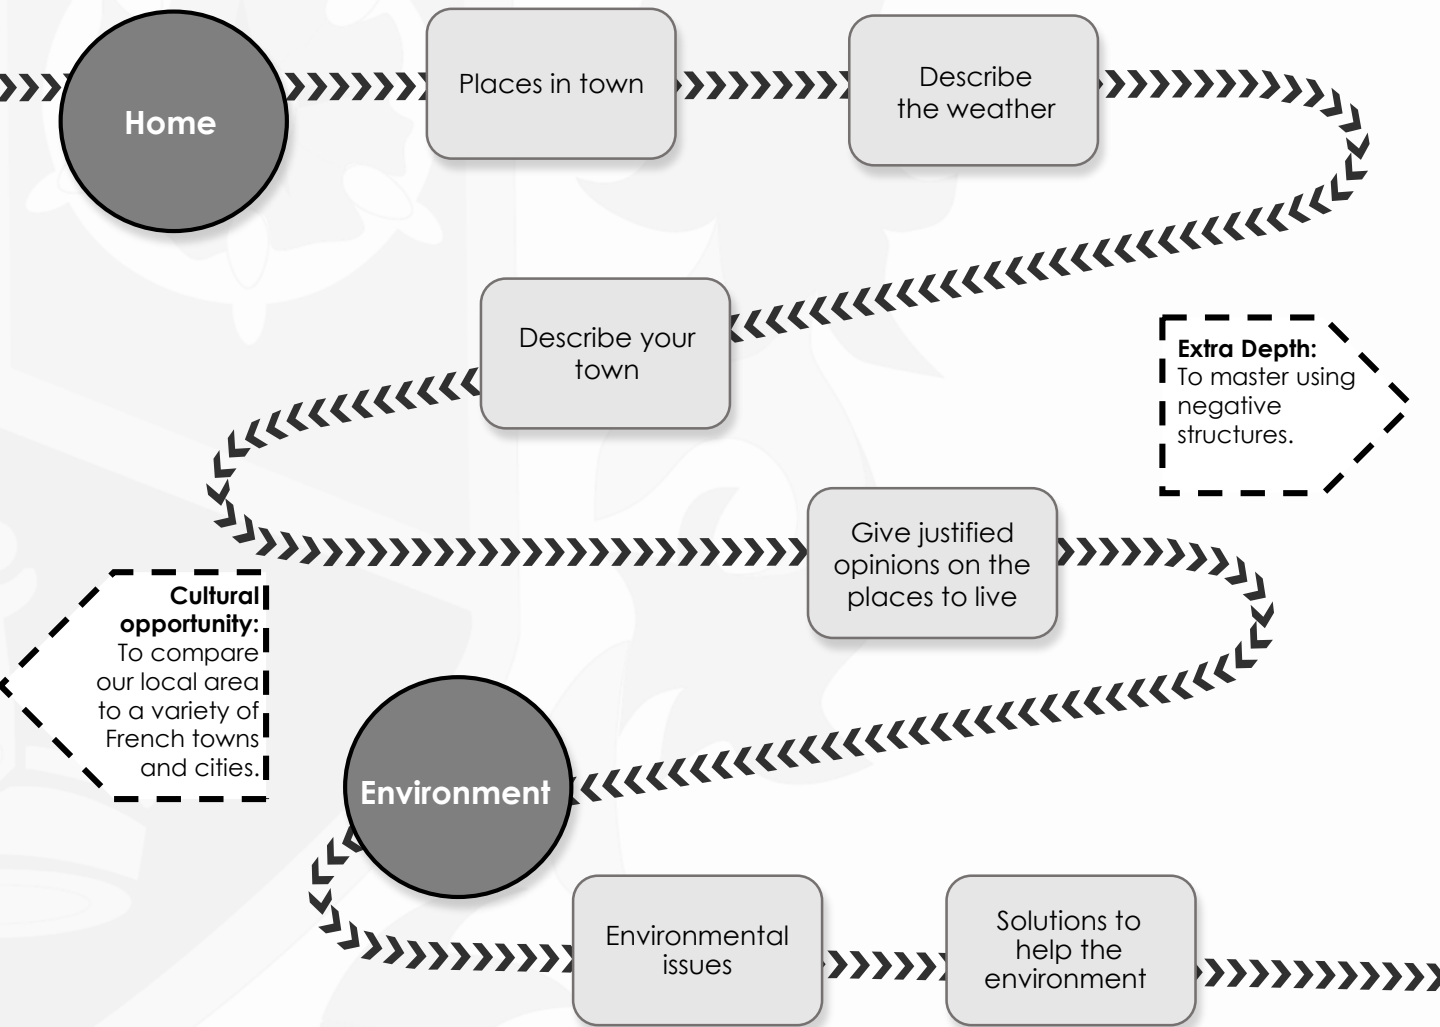

# Français

**Year 9:** L'environnement qui m'entoure (Home and Local Environment)

## Spring Term 2

Building on from the topics of Town and Hobbies in Year 7 and Home in Year 8, this topic will help you to develop your confidence using vocabulary and structures linked to your local town while introducing new vocabulary on the environment. This is a topic which requires more maturity to talk about the environment and how to protect it which is extremely relevant for today's society and leads on the social issues topic studies in Year 11. The grammar in this topic includes elements such as negative structures, modal verbs and using infinitives. These skills are vital to allow you to recognise higher level French and to create more complex language structures.

**TUDOR HABITS:** Remember that learning a language is a process and the end product can be used in real life, useful and exciting ways. Try to be **creative** with the language you use and when you receive feedback, be **reflective** on how you can improve. Most importantly, always take **pride** in your work.

### VOCABULARY:

#### Tier 1 French vocabulary

Une bibliothèque = A library

une librairie = A bookshop

Recycler = To recycle Depuis = since

#### Tier 3 Grammatical Terminology

Weather structures, Negative structures
