

LEARNING JOURNEY MATHS

Sequences and Graphs

Year 9 Autumn Half Term 1

Patterns appear all around us in the real world. Patterns such as the way turtle shells look or the formation of seeds in a sunflower can all be explored through maths. As mathematicians we use maths to try and make sense of these patterns. Graphs is the core theme of the entire year, and this half term will consolidate your understanding of ratio and proportion, whilst building on your algebra skills from Year 8. This half term we will be looking at graphs in an abstract way. We will use the skills you develop to help us understand real-life graphs next half term.

TUDOR HABITS AND VALUES: Graphs are a difficult concept to try and understand. They can be very abstract. As mathematicians we need to show grit and determination to help us work through these difficult concepts.

VOCABULARY

- Term
- Linear
- Intercept
- Gradient
- Co-ordinate
