

LEARNING JOURNEY FRANÇAIS

Year 11: Les médias et la technologie (media and technology) Autumn Term 2

In Year 8 and year 9 you covered the topic of technology, looking in particular at the vocabulary to describe activities online. You can now develop this by revising the vocabulary linked to technology and also deepening your knowledge when expressing and justifying opinions on the benefits and dangers of media and technology. This topic is a good opportunity for you to revise degrees of comparison, modal verbs (on peut = one can) and to continue revisiting present, past and future tenses. The topic of technology is one of topics that will be included in the GCSE exam papers and therefore it is not only important to recognise the vocabulary in listening and reading but also to be able to develop answers on the topic of technology in speaking or writing.

TUDOR HABITS: Be reflective: This topic allows you to explore lots of aspects of grammar e.g. tenses and connectives that have been covered previously. You will need to **critically reflect** upon your understanding of these, to identify which aspects you need to perfect ahead of your trial exams.

TIER 1 FRENCH VOCABULARY:
 Un portable = a mobile 'phone
 Un ordinateur = a computer
 Le réseau social = social media
 En ligne = on line
 envoyer = to send
